

# Assignment 1: A Custom Homepage

Due: Week 6 at 11:59pm.

## Description:

Using what we have covered so far, create an engaging homepage. This homepage should be all about you and your goals after the program, some ideas:

- What have you learnt so far.
- A project or assignment that you are really proud of.
- What you hope to do after your graduation.
- Accomplishments that you are proud of so far.

## Submission Details:

Please read and follow the submission instructions carefully, if the submission **does not** follow the instructions a **zero** will be provided for the assignment.

- Upload your theme folder to your GitHub repository
- Submit the GitHub link to the Blackboard Submission
- Create a user for me, add the username and password to the submission.  
Failure to provide this information will result in a zero.

## Instructions:

Please read and follow the instructions carefully:

1. Create a Theme and name it **assignmentone**.
2. Upload your screenshot.png.
3. Create your homepage template.
4. Create your homepage, to control the content you are welcome to use the default content editor, the classic editor, or the plugin "Advanced Custom Fields".
5. Create at least 3 categories.
6. Create at least 3 posts.
7. Your webpage should contain the following:
  - a. Header template.

- b. Footer template.
  - c. Navigation.
  - d. A list that dynamically displays your posts and featured images.
8. Create your own custom stylesheet to apply your CSS.
